SKP ENGINEERING COLLEGE,

TIRUVANNAMALAI - 606611

ANNA UNIVERSITY: CHENNAI 600 025

September-2025

We are very thankful to the management of **SKP Engineering College, Tiruvannamalai** for giving us this wonderful opportunity to study in this college and utilize all the facilities to the fullest.

Our sincere thanks to the lord blessing on us for the successful completion of our project. We proudly thank **Mr. K. KARUNANITHI, B.E., MBA**, Chairman, **Mr. K. V. ARANGASAMY**, Joint Secretary and **Mr. R. SAKTHI KRISHNAN, M.L., M.B.A., Ph.D.**, CEO of our college for providing the facility to do the project. We are grateful for our Principal **Dr.S.BASKARAN, M.E, Ph.D.**, for his constant support and encouragement to our internship .

We express our sincere thanks to **Dr. V. RAJI, M.E., Ph.D.**, Head of the Department of Information Technology and Our Class Advisor **Mr. L. SANKARAN, M.E.**, and our internship co-ordinator **Ms. M SAMHITHA, M.E., (P.h.D.)** for her guidance, timely suggestions and word motivation.

It is a Great pleasure to express our gratitude and thanks towards our internship Guide **Dr.V.RAJI,M.E.,Ph.D.**, for his uninterruptable suggestions and words of improvements regarding this internship , which played a major role in guiding us in our track.

We also extend our thanks to our Class Advisor and every member of the faculty who provided valuable academic guidance, and their co-operation to do this successful internship. Finally, we would like to thank our parents, relatives and friends for their encouragement and enthusiastic co-operation.

HTGE Technologies Pvt. Ltd. is an Information Technology organization established in **March 2017**. The organization was initially launched as a learning academy, **Hi-Tech Institution**, in **Pondicherry, India**. Over time, **Hi-Tech Group of Enterprises** expanded its operations into **four different verticals** under the Hi-Tech brand.

HTGE Technologies Pvt. Ltd. is one of the **leading IT companies in India**, with its **headquarters located in Pondicherry**. We deliver high-quality IT services with complete customer satisfaction and serve clients **worldwide**.

Since 2017, we have been successfully operating in the IT industry. What began as a small office with a few clients has now grown into an organization that proudly serves **over 50 clients globally**. Our focus on quality services and customer success has been the key to our growth and sustainability.

Our Subsidiaries

1. Hi-Tech Institution
2. Hi-Tech Virtual Promotions
3. Hi-Tech Solutions
4. Hi-Tech Career Builder

Our Mission

We always ensure to give best solutions to our customers and we make them happy to have good experience with us by our services

Our Vision

To provide extraordinary services to our clients by fulfilling their requirements.

Our Philosophy

Our Root Level Solutions will give you Better Growth always.

INTERNSHIP COMPLETION

CERTIFICATE

This Certificate Is Proudly Awarded To

IYADE AFFAN M.A

This is to certify that has successfully completed the “CLOUD”

INTERNSHIP.

From **02 May** to **02 November 2025** In the duration of **Six Month**.

Date Awarded

Nov 05 2025

Director

HTGE TECHNOLOGIES PVT. LTD.

INTERNSHIP ATTENDANCE LETTER

Date: 28-October-2025

This is to certify that **IYADE AFFAN M.A (REG NO: 51222205019)**, B.Tech IT student of "**SKP ENGINEERING COLLEGE**" has been accepted to do "**INTERNSHIP**" at "**HTGE TECHNOLOGIES PVT. LTD.**"

As per the record, attendance for the period is from **02/05/2025 to 02/11/2025**.

For HTGE TECHNOLOGIES PVT. LTD.

Project Documentation

Title: Deployment of a Website on Linux with AWS RDS Integration

Abstract:

This project aims to develop a web-based Electronics Parts Sales and Inventory System that manages electronic product data, customer records, transactions, and inventory levels. The system enables seamless order tracking, stock monitoring, and user authentication, ensuring efficient sales and inventory operations. Hosted on AWS (EC2 + RDS), it integrates a PHP frontend with a MySQL backend to support real-time data access and scalability.

Introduction:

In the current digital era, managing inventory and sales using manual methods or spreadsheets leads to data inconsistency, human error, and inefficiency. A centralized web-based system provides automation, improves accuracy, and enhances user accessibility. The Electronics Parts Sales and Inventory System is designed to serve small-to-medium electronic parts businesses by offering a responsive and easy-to-use interface for managing employees, customers, products, and sales.

Existing System:

The existing manual or semi-digital systems suffer from:

- Manual entry errors and duplication
- Delayed stock updates
- No real-time sales data
- Lack of multi-user access and audit trails
- No cloud-based accessibility
- Difficult to scale and integrate with modern applications

Proposed System:

The proposed system overcomes the limitations of the existing one by:

- Automating all key operations (sales, customer, inventory, and employee management)
- Storing data in AWS RDS MySQL for cloud-based accessibility
- Using a PHP-based UI hosted on an EC2 instance

- Supporting secure login for admins and users
- Providing detailed reports and real-time stock levels
- Enabling CRUD operations (Create, Read, Update, Delete) via a responsive interface

Key Modules:

- User Authentication (Admin, Staff)
- Customer Management
- Product & Category Management
- Inventory Tracking
- Order & Transaction History
- Reporting Dashboard

Conclusion:

The Electronics Parts Sales and Inventory System successfully streamlines the sales and inventory processes for electronic businesses. By migrating to a cloud-based architecture, it ensures data reliability, accessibility, and performance. It reduces manual efforts, enhances accuracy, and provides clear visibility into operations.

Future Enhancements:

- ~ Add barcode/QR code scanning for inventory
- ~ Implement role-based access control
- ~ Introduce RESTful APIs for mobile app integration
- ~ Integrate with payment gateways and e-invoicing
- ~ Add email/SMS notifications for stock alerts and order status
- ~ Include advanced data analytics using dashboards

System design:
